

# VIDEO JUNCTION BOX Model 1

For professional SONY monitor e videorecorders

Power Supply **AC** : 220 V  
or **DC** : 12 V  
( with external DC-AC INVERTER )

It **PREVENTS** the possibility of connecting errors during shooting because all the wiring is pre-assembled inside the case.

It **MAKES** easier the right connection with:

**VIDEO Assist** (from Camera)

and

**AUDIO Signal** (from Sound engineer)

It **IMPROVES** the reliability and drastically reduces the Service, because on the Set, all the everyday's connecting of external cables is made only on the sturdy **VIDEO JUNCTION BOX** and not directly on the expensive instruments.

Rugged box and plate, designed for use and abuse on the Movie Set.

Cabled inside interference protected case.

Designed to eliminate all external cables to avoid potentially **DANGEROUS** contact with them.
